

DevOps Engineer

Job Description

R Systems is looking for a talented and passionate DevOps engineer to join our growing team focused on software development for the telecom industry.

If you consider yourself an innovator and are looking for an opportunity to be part of a world-class team providing end-to-end development, system integration, and technical consultancy services, this mission is for you!

You'll enjoy:

- A key role in a team with senior engineers developing and bringing innovation into existing systems
- The opportunity to work with some of the most in-demand technologies, joining some of the most important global telecom players
- Career and professional development opportunities (certifications, workshops, training sessions)

Your contribution:

- Assist projects with CI/CD setup in an environment implemented on a private deployment of GitLab Enterprise Edition (EE) hosted on-premises
- Automate deployments of existing projects
- Automate infrastructure deployment and configuration
- Build Infrastructure as Code using technologies such as Ansible, Helm, Puppet, or Chef
- Manage containerized environments (Docker, LXC, K8s) and Kubernetes clusters
- Manage virtual environments based on different virtualization tools (VMware, OpenStack)
- Prepare relevant technical documentation for the above responsibilities.

Bring along:

- At least 3 years of experience in DevOps practices and processes
- Good understanding of containerized environments (e.g., Docker, Kubernetes) and virtualization tools

- Proficiency in at least one of the following scripting languages: Bash, Python, or Perl
- Familiarity with databases (e.g., MySQL, MariaDB, Elasticsearch, Influx DB, etc.)
- Understanding of code versioning tools (e.g., Git, SVN) and CI systems
- Analytical thinking and a problem-solving mindset, to net down potential issues and find innovative solutions
- Good ability to prioritize tasks and manage your time efficiently
- A self-driven and proactive mindset that allows you to work both independently and as part of a team
- Advanced English skills in both spoken and written communication

What's in it for you (additional benefits available in each of our country locations):
